SUMMARY

I am a Software Engineering student who enjoys exploring and solving problems in both Front-End and Back-End worlds. Because my curiosity and strong love to learn makes me want to know more about the ins and outs of the tools I am working with, I also like writing in-depth articles about them in which I share my findings and other interesting facts.

Experience

SOFTWARE PROJECTS

Personal website:(*git repository as personal-portfolio*)

- Still under development as found on the github account
- Successfully and accurately translated design specifications into code.
- Technologies used; bootstrap, saas

Hiring platform: *http://bedsidenursing.herokuapp.com*(*Git repository as bedside*)

- Successfully and accurately translated design specifications into code
- Leveraged Django in order to efficiently handle and combine complex data flows in the application.
- Setup the roots of the application and am continuing to add features till the client will possess it.
- Technologies used; bootstrap, saas, django (python),

WRITING TECHNICAL ARTICLES: Go To Jonathan's articles

- I always like to share technical knowledge about software engineering.

More small projects will be attached within the courses I have accomplished thus far like cs50(Harvard's intellectual enterprises to the art of computing).

Education

Currently studying at the University
Makerere university, Kampala– *Bsc. software Engineering, expected to graduate in 2025.*

skills
(Proficient): HTML/CSS, javascript,node.js, SQL, Flask,Django
